Duration of the project**3 years**

PROJECT DESCRIPTION:

Objectives

The main objective is to create the appropriate conditions necessary for the high-quality learning process (and for research) in molecular medicine, based on the cell and molecular biology laboratory infrastructure modernization and human resources for sustainable development.

Sub goals:

- to promote the quality of education, research and capacity building in molecular medicine, supporting the development of modern standards;
- to improve the quality of education in the fields of molecular medicine;
- to create conditions for supporting the research in the cell and molecular biology topics;
- to enable exchange/trainings on methods and experiences in cell and molecular biology. These exchange/trainings outside (in partner universities) and inside are intended for the academic staff and for students working in educational and research in those topics;
- to disseminate the project outcomes through educational events, meetings, workshops and on-line publications, including support for participation in European conferences
- to promote Kosovar molecular medicine visibility and competitiveness at the international level.

Activities

The Faculty of Medicine of the Uni. Prishtina pledges that it will participate in and promote the modernization of higher education and internationalization. The major activities will be as following:

- establishment of cell and molecular biology laboratory capacities;
- academic staff and students exchange/trainings for developing human resources;
- educational events for increasing mobility and communication of staff and students;
- facilitation of communication between researchers through a support attending European conferences and covering paper publications.

Results

Expected results are going to:

- establish molecular medicine laboratory capacities;
- increase international cooperation and competitiveness;
- improve education practice methodology and quality;

Erasmus+

Partner Search Form

- improve quality of education and creating conditions for performing research in molecular medicine.

We are searching for:

Types of institutions	Educational and research.
Country/Region	Any country.
Institutions' profiles	Education and research profiles in cell and molecular biology for medicine.
Other relevant information	Uni. Prishtina has previous grant holder experience with tempus and Erasmus projects.
