# About the Project

Web3 Innovation HUB

01.2025- 12.2027.

Higher Education Institutions and  
Industry Partners from the Western  
Balkans and the EU

890,000 €

**2**

## **Project Objectives**

## Main Objective

Enhance regional innovation and entrepreneurship capacity in the Western Balkans through developing Web3 and entrepreneurial skills, fostering green blockchain solutions, and establishing decentralized science communities.

## Specific Objectives

- ◆ Develop and implement new Web3 courses.
- ◆ Set up a Web3 startup incubator focusing on green blockchain solutions.
- ◆ Establish a Decentralized Science (DeSci) network.

**3**

## **Project Methodology**

## Education Pillar

Development and implementation of Web3 courses in higher education institutions (HEIs).

## Startup Incubator

Creating a regional incubator to support Web3 startups, with an emphasis on green blockchain technologies.

## Decentralized Science Network

Establishing a collaborative network to promote decentralized research practices.

**4**

## **Key Activities**

- ◆ **Web3 Curricula Development:**  
Creation of new and updated Web3 courses.
- ◆ **Web3 Startup Incubator:**  
Launching a regional startup incubator program.
- ◆ **DeSci Network:**  
Educating and connecting researchers to foster decentralized science.

**5**

**Expected Results**

## Education

At least 6 new Web3 courses developed and implemented (2 courses at each of three universities) and included in the curricula of these universities.

## Innovation

Development of 20 green blockchain solutions per incubator cohort.

## Research

Creation of a DeSci network with 150 participants in its first year.

6

## Impact and Sustainability

- **Long-Term Impact**

Strengthening the region's capacity in Web3 technologies, innovation, and sustainable growth.

- **Sustainability**

Focus on integrating outcomes into HEIs, supporting local entrepreneurship, and ensuring the project's continuation through collaboration with external stakeholders.
